Dear Sir. I am at present endeavouring to get a few specimens of different manufactures for this school. We are unfortunately without anything of this kind. Descriptive wall sheets and specimens of goods in various stages of manufacture are now of the highest importance both for class teaching and for continual reference. I therefore feel the want very much.

I will count it a very great favour if you can see your way to give me anything in the way of the kind I have indicated above connected with the production of your goods.

I am aware that in some cases the specimens are of such a nature that a charge must be made for them. If this is so in your case I shall be happy to arrange. Awaiting to have an early & favourable reply

I am, Yours faithfully,

LIBRARIES.

Central Library,
395, High Road,
Tottenham,
October, 1905.

Dear Sir, or Madam,

From time to time, for some years past, the Public Libraries Committee have received suggestions that a Museum should be established in Tottenham.

An opportunity occurred during the present year for securing an excellent collection of Minerals and other Geological specimens for a nominal sum, and at the same time an offer was received from Mr. H. E. H. Smedley, F.L.S., F.G.S., to loan his Museum Collection to Tottenham, and to give his services as Honorary Curator.

After careful consideration the Public Libraries Committee decided that such opportunities should not be lost, and they accordingly asked the Urban District Council to avail themselves of these offers, and to provide accommodation for the reception and exhibition of the specimens. The Council accepted the offers and allocated three rooms on the first floor at "The Chestnuts," St. Ann's Road, for the purpose.

Further, the Council decided, as there are no funds at present available for the provision of suitable cases for the

Kew Gardens.

It was indeed 'royal' of you
to remember us after such a
length of time and speaks
highly for the order and
regularity of your establishment
Thanking you once more,

PUBLIC LIBRARIES.

(598)

Central Library,
395, High Road,
Tottenham,
October, 1905.

Dear Sir, or Madam,

From time to time, for some years past, the Public Libraries Committee have received suggestions that a Museum should be established in Tottenham.

An opportunity occurred during the present year for securing an excellent collection of Minerals and other Geological specimens for a nominal sum, and at the same time an offer was received from Mr. H. E. H. Smedley, F.L.S., F.G.S., to loan his Museum Collection to Tottenham, and to give his services as Honorary Curator.

After careful consideration the Public Libraries Committee decided that such opportunities should not be lost, and they accordingly asked the Urban District Council to avail themselves of these offers, and to provide accommodation for the reception and exhibition of the specimens. The Council accepted the offers and allocated three rooms on the first floor at "The Chestnuts," St. Ann's Road, for the purpose.

Further, the Council decided, as there are no funds at present available for the provision of suitable cases for the

Kew Gardens.

proper exhibition of the collections. to issue a public appeal for subscriptions for the purpose of furnishing the Museum, and for donations of objects of interest.

The cost of furnishing the Museum is estimated at £250.

The Museum collection already comprises about 5,000 specimens of Rocks, Minerals, and Fossils, forming a valuable and interesting nucleus, and also a few specimens of Zoological subjects.

Should the amount needed be subscribed, as the Committee earnestly trust, it is intended that the collections should not only be available for the use of the general public, but they hope Science Circles of Students may be formed for the study of Nature, and that specimens from the collections should be loaned to the Schools of the District when required for illustrating similar work there.

Should this project commend itself to you, any contributions in money, or suitable objects for exhibition, may be sent either to the Chairman of the Committee, to the Librarian, or to the undersigned, at the Central Public Library, by whom they will be gratefully received and acknowledged.

I am,

Dear Sir, or Madam,

Yours obediently,

E. CROWNE,

Clerk of the Council.

Dear Sir

The above school is a recognized "Board of Education" Technical training school for crippled boys. We are most anxious to further the work, by the formation of a small museum of specimen pieces of timber etc. Having spent, and derived much benefit by frequent visits to the splendid Timber museum at Kew. I hope you will excuse the request of any help you could give us in forming that collection If you could possibly assist us by the sending of any surplus specimens you may have, we should feel very grateful. The study of the "Timbers of Commerce" is

is taken in connection with their Technical Work and so much appreciated and enjoyed by our afflicted boys. Any specimen of section, or growth of wood, or foliage, of which you could be our best adviser, that could provide any educational interest, would be thankfully accepted, and I enclose by same post a copy of report on the school's work and object hoping you will pardon this request if not able to grant, and I remain.

yours obediently

24th Septr. 1906.

Sir,

We desire to add to our exhibits of Wild Flowers, Brendel Models, &c., specimens to illustrate economic botany, e.g. Brazil nuts in pods, Cocoa nuts in husk, &c., and foodstuffs as grown — rice, &c., in husk. If you have specimens for distributing they will be thankfully received, taken care of and displayed by us. It is the desire of my Committee to make the park and museum educational; and to that end we have recently formed and opened a ~~school~~ garden for "Nature study" in the park.

If you can place us under the "favoured nations" clause please do so, and oblige

Yours faithfully
Edward Hewitt
Curator

Dear Sir

I write to ask whether you still supply schools with samples of fibres and seeds - If so, I should be very pleased to receive some. I have lately been appointed to this school, which is right in the slums, and being an enthusiastic botanist, I wish to introduce a course of Nature Study. I should therefore be very glad of any specimens which would be likely to help in such a course, and would willingly pay for the carriage of such -

Dear Sir

I am starting a Museum of preserved Botanical Specimens for this College, and I have been informed by Curators of other Museums that possibly you might be good enough to send me some specimens which I require for preparation, from Kew.

I wish especially to secure specimens of abnormal leaves, stems & branchings; the cones of Conifers, and also insectivorous and climbing plants.

If you would be so very kind as to allow me to have my specimens from Kew I should be very grateful

(Affiliated to the N.F.A.T.).

October 10th 1908

Dear Sir.

I take this liberty of writing you to ascertain whether you could furnish me with a collection of foreign hard woods used either commercially or for ornamental purposes. I thought in all probability you might have duplicate specimens which you could conveniently spare.

I am a Trained Certificated Teacher and have been engaged in teaching Woodwork for the past 10 yrs. and at the present time am responsible for 1100 boys in a large Woodwork centre at Nelson St School. It is my object to obtain as many specimens of foreign woods — especially rare hard woods — as possible in order to increase the educational value of my work. Therefore I shall esteem it a great favour if you could accede to my very earnest request.

May I respectfully suggest that pieces approximating to 12" long & 9" wide would be most acceptable. & the carriage of which I would willingly defray.

Thanking you in anticipation of your kind

reply. I have the honour to be,

Yours Respectfully,

F W Abel.

P.S. Should my request be granted, may I ask you to direct specimens to

Mr F.W. Abel.

Nelson St. School.

Norwich.

T84

Exhibition was concerned.
I was therefore very pleased to learn that I could have some specimens from Kew, and I have no doubt that they will compensate me for my disappointment at Earls Court.

If you have anything in the nature of duplicate cones etc which would be of value educationally they would be gladly accepted

Thanking you in anticipation

I am,

Yours faithfully,

F.W. Abel.

Specimens for Geography [Subject].

During the past few years I have endeavoured to teach Geography largely through the eye. I collect, or borrow, specimens of animal, mineral, or vegetable products - natural and manufactured and exhibit these to the boys during lessons.

Besides the above - for the two weeks nearest to Empire Day - May 24th. in each year I turn the School into a Museum of Products of the British Empire.

Inspectors - Managers, Teachers from various parts and the parents of the children visit and examine. The five hundred (500) boys, and the older girls receive lessons on the exhibits.

We have many exhibits from various parts of England, Scotland & Ireland & Wales

4. Canada. 5. Australia. 6 India
7. New Zealand. 8. West Indies.
9. Tasmania and the Minor Colonies
10. South Africa.

It is early to write concerning an exhibition to be held in May - but it is so difficult to procure that I start early. Can you, sir, assist me by lending specimens of wood or anything from any of the above Possessions, and if so would there be any cost? I wish the latter, as I have to defray cost out of my own pocket.

Trusting you may be able to help

I am sir

Yours obedient servant

E. Lewis

Dear Sir, (616)

We have the pleasure of educating a large number of candidates for the examinations of the Surveyors Institution. One of the subjects that we teach is Forestry, in connection with which we give them samples of British timber. We have experienced considerable difficulty in getting the samples we would desire, and so we fear that there may be a probability of obtaining some from you; we beg to say that we should greatly esteem it a favor if you could kindly arrange to let us have some. We are of course willing to pay any reasonable sum.

Yours faithfully

— Watson Esq.

the case at the present time as there was in course of preparation at the gardens a new museum which was to be devoted to specimens of British timbers.

As I am studying Forestry & take a great interest therein I should feel extremely obliged if you would kindly let me know if there is any likelihood at present or in the near future of my being able to obtain any such specimens of British timbers from you, & if so what kinds.

I have specimens of a certain number of the more generally used timbers such as Oak, Ash, Elm &c., but find it rather difficult to obtain from timber merchants, specimens of those less frequently used, especially transverse sections.

I should also feel very much obliged if you could inform me how to preserve the leaves & flowers of trees, on the twigs, by other means than pressing, as by this method, some of the characteristic features are

Dear Sir,

We are engaged in re-organising our Botanical Department, and find we are very weak in Gymnosperms. We should accordingly feel highly indebted to you if you could see your way to present us with a few objects typical of this class and suitable for public exhibition. The following genera in particular would be much appreciated by my Committee:-

cones of Pinus (Pinaster and Strobus), Picea, Abies, Araucaria;

any specimens of Ginkgo, leaves and fruit;

cones and sporophylls of Cycads;

any specimens of the Gnetaceae, especially of Welwitschia.

We would of course, gladly pay carriage on any objects you might kindly forward.

Yours faithfully,

J. Charlton Deas

School Board for London,

Victoria Embankment, W. C.

December 19, 1899.

Dear Sir,

The Board, in May, 1898, had their attention called to the manner in which flowers gathered in the Town Gardens of Berlin were placed in the Upper Grade and Lower Grade Municipal Schools for the purpose of furthering the study of Botany.

The Board were of opinion that such a scheme would be the means of increasing the educational value of the instruction in their schools.

As Chairman of the School Management Committee, I accordingly had an interview with Colonel Wheatley, of Her Majesty's Office of Works, and as a consequence a fortnightly supply of flowers, leaves, cuttings, &c., are now being forwarded from the Royal Parks to selected schools for the purpose of teaching Botany and Drawing, and for Object Lessons.

The resources of the Royal Parks would be greatly strengthened if materials from the Royal Gardens at Kew

which would otherwise be thrown away such as the dead stems of endogens, fir-cones, bulbs, and discarded specimens from the museums, were available for the use of the Board.

In these circumstances I desire to bring the foregoing facts before you in the hope that you would be good enough to assist the Board in a scheme which shows every sign of becoming a great success, bringing as it does the children into direct contact with nature instead of with drawings and other representations from nature.

In the event of the Board being so fortunate as to secure your co-operation in the scheme, it is suggested that we should be allowed to place a box or boxes in Kew Gardens into which all such specimens, &c., as might be available for the use of schools could be placed, the box or boxes being periodically cleared by our representative.

It should be added that the Board's gardener and his assistant staff, who are also servants of H.M.Office of Works, have their head-quarters at the Store-yard, Hyde Park.

I am, etc.,

(Signed) Graham Wallas.

Chairman of the School Management Committee.

Sir W. T. Thiselton-Dyer, K.C.M.G., C.I.E.,
Director,
Royal Gardens, Kew.

R. S. K.

Dec. 21. 99

Sir,

I have the honour to acknowledge your letter of December 19 relative to the supply for the use of Selected Schools of materials ordinarily taken away in the Royal Botanic Gardens and of decayed specimens from the museums.

2. I find that the Board's Gardener, Mr. Kew, has already had communication with my staff on the subject and the arrangement suggested is considered on both sides as practicable. I have therefore given directions for the ~~collection~~ carried out of such materials. It is understood that your Bd. Board will undertake to remove the materials when accumulated.

I remain

Graham Wallas Esq
School Board for London
Victoria Embankment

I have to forward herewith for your secret a syllabus of Scripture & Instruction to be used in Elementary Schools as apply for them throughout the country. Special Grants and Applications from the Managers & the Royal Naval Schools. Grants have been made, as hitherto is available (from time to time) in the order of application. The Headmasters & such Schools under your Board as desire to share in the distribution should therefore make individual application to be placed on the list. It must be understood, however, that the amount of money available for distribution is limited and that some time may elapse before any individual application can be considered.

2. I should like in conclusion to congratulate the Chelsea Naval School which has been specially organised under a Board of Trustees for Education for Service

15th January ~~-789~~ 1900.

Supply of Flowers, Leaves, etc., from the Royal Parks.

Dear Sir,

I have to acknowledge, with thanks, the receipt of your two letters dated respectively the 21st December and the 5th January. The former letter will be laid before the first meeting of the Special Subjects Sub-Committee after the Christmas Recess.

The arrangements which you have been good enough to sanction in the second paragraph of your letter will be of great educational value to the work of the Board.

With reference to the third paragraph of your letter dealing with the system of the distribution of discarded specimens and duplicates from the museums of the Royal Botanic Gardens, the School Mamagement Committee will be glad to submit to you as soon as possible a list of Head Teachers of such selected schools as, in the opinion of the Committee, would derive the greatest advantage from the facilities you have kindly offered to afford.

I would, however, add that it would be a great convenience in the administration of the Board's Botany Scheme if you could see your way to allow whatever discarded specimens, etc., might fall to the share of the schools of the Board to be supplied en bloc to the Board direct for distribution as part of the Botany scheme. If this latter course

Sir W.T.Thiselton Dyer, C.M.G.,C.I.E.,
Director,
Royal Gardens,
Kew.

course could be adopted, the Board, through its chief gardener, would be not only able to keep a list of the specimens and the schools to which they were supplied, but would also be able to distinguish between the specimens shown as supplied from the Royal Parks and those supplied from the museums of the Royal Gardens at Kew.

The attention of the Committee is being given to the important question of utilising as far as possible the resources of the Chelsea Botanic Gardens.

I am, dear Sir,

Yours faithfully,

Graham Wallas

Chairman of the School Management Committee.

With reference to the distribution of duplicate museum specimens it may be well to remember that there are already 165 applications from Schools that have not yet been acceded to, though promised. The first application to be taken dates back to August 1894.

Practical Geography [SUBJECT.]

Sir,

For several years I have endeavoured to teach a certain amount of Geography by means of an Exhibition of Products of the Empire.

believing that children remember well things they see and handle. For this purpose I gather as many Natural and Artificial (Manufactured) objects as possible - and for two weeks round "Empire Day" hold an Exhibition.

The Class rooms represent 1. Homeland. 2. Scotland & Ireland 3. Canada. 4. Australia. 5. India. 6. West Indies. 7. British Possessions. Africa.

Enclosed are photographs showing former Exhibits.

I am attending the lectures and demonstrations by the Assistant Director of the Gardens - A.W. Hill Esq. and having had the privilege of seeing and handling a number of Objects, know how valuable it would be to have such (and others) lent to me for the two weeks

London County Council.

Commencing May 18th

Anything from India and our Colonies would be of use

This (Boys') dept. has 580 scholars. The whole of these, during the above named period receive special lessons and some of the older girls (about 120) also attend.

Further, the parents and friends of the scholars visit on one or two evenings and learn much from the Exhibits.

I will take great care of anything you are good enough to lend, and return everything immediately the Exhibition closes.

Trusting you will be kind enough to favour me without delay,

I am

Yours obediently

THE ADDRESS ONLY TO BE WRITTEN HERE.

Royal Botanic Gardens, Kew.
May 1, 1914.

Sir,

I have to acknowledge receipt of your letter of April 27, 1914, and of the interesting photographs showing your collections of 'Products of the Empire'.

With regard to your request for specimens on loan I regret that it is not possible for us to help you as we do not send out our Museum specimens on loan.

Until the absorption of the London School Board an arrangement subsisted under which duplicate Museum specimens were sent to the Head Office to be distributed thence to the schools which might make application for them.

I do not know whether in taking over other functions of the School Board the Education Department of the L. C. C. has taken over the distribution of such duplicate specimens. Possibly an application made by you to the Education Officer would elicit the necessary information and if the reply be in the affirmative might lead to a request from the Education Officer for a further supply of duplicates from the Museums of the Royal Botanic Gardens, Kew, on behalf of the schools of London.

I may add, however, for your present information that our stock of duplicate material is very small at present and in any case it would be impossible to afford you any assistance for your exhibition this year.

I am, Sir,

Your obedient servant,

(Signed) D. Prain.

Director.

C. B. Chase, Esq.,
L. C. C. School,
Gloucester Rd. Peckham.

☛ *If the Letter is in reply to a communication from the Education Offices, please state here the reference heading and number of communication.*

The correspondence of all departments of the School should be enclosed in one envelope, addressed to the Education Officer. Special envelopes are supplied for this purpose.

It is particularly requested that, as far as possible, each letter may be confined to one subject.

[SUBJECT.]

Sir

For some years I have endeavoured to interest my boys in "Nature"

This year I desire the various classes to watch certain trees – each class three trees – and for this purpose – at this time – I want Twigs of those trees with growing buds. We shall keep the twigs in water and watch the buds develop. I venture to ask your valuable aid & beg of you to send me a few twigs of each of the trees on enclosed list. I have the honor to be

Your obedient servant

Sir,

I beg to thank you most sincerely for the splendid parcel of specimens delivered here yesterday. The information attached to the specimens is most useful, & the various objects will vastly improve our Geography lessons.

Our children are regularly taken to the Gardens every alternate week for Nature Study, and, without desiring to impose on your generosity, we should always be delighted to receive any little parcel of specimens - especially from our Colonies - & willingly defray not only the expenses of carriage but packing as well.

On behalf of the children I thank you most heartily, & beg your acceptance of a copy of our last magazine written almost entirely by our Scholars & containing some of the youngest children's earliest

attempts at "Observation
+ Nature Study".

I am. Sir

Your obedient Servant

George Gill.

Dear Sir,

I am wondering if when you cut down any of the trees in Kew Gardens you coued send me some specimens for my class at the L.C.C School, Mowlem Street, Bethnal Green. NE. I am one of the Handicraft Instructors at the School and the specimens would be of very great use during my lessons. With many thanks Yours faithfully.

I. Remnie Parsons

The Curator.

Wrote offering some dups. Barnston Echo Ltr rec'd. 19.2.12

1st. Feby 1912

Dear Sir:-

I thank you for yours of the 31st ult and for your kindness in offering us some of your duplicates.

I shall be pleased: on behalf of our Notts Teachers; to accept anything which you can spare us and will inform them of the additions to our stock so that the specimens may be used for educational purposes.

I enclose herewith a portion of our "list of lessons in stock" and as you will see from it we are really very badly off for Botanical specimens.

I also enclose one of our Requisition sheets on the back of which you will find the few simple rules I have for working the scheme. My Committee have allowed me to store the specimens here and the Notts Education Committee pay for the carriage of the boxes to and from the schools so that we do not have to charge the Teachers anything for the use of the specimens and as regards the preparation and mounting of the Birds, Animals, Reptiles etc. that is my hobby.

Yours faithfully,

J. T. Houghton

Dear Sir,

I beg to acknowledge receipt of some bamboo ropes and various botanical specimens which have been kindly forwarded to this Museum. They will be very useful to us in the effort we are making to develope the economical side of our work.

Yours faithfully,

T. Sheppard

The Director,

Royal Gardens Kew.

Dear Sir,

I beg to make application on behalf of the Committee of this museum, for a share of any duplicate museum specimens illustrating economic botany, which you may have for disposal.

Any assistance you may grant us in this way will be greatly appreciated. Thanking you in anticipation of a favourable reply, I remain,

Yours faithfully,

F Williamson
Curator

Dear Sir,

For lecturing and demonstration purposes to classes of teachers and children on timber and timber trees (growth, habitat &c.) in connection with Handicraft classes in this County, I should like to have some specimens of leaves, cones, seeds &c., of trees which are converted into timber for general use and would be grateful if you can give me any information as to how they may be obtained.

Yours faithfully,

F. T. Craft.
